

Rag Fabric Christmas Ornament

Supplies:

Christmas Fabric cut into 1 ½" wide 15" - 17" vertical strips (3 different patterns, 2 strips of each one to cover the foam ball)

Craft Foam Ball 4" in size

Glue or Modge Pod in the Easy Squeeze Plastic Container

Jute twine

Christmas Embellishments such as greenery, berries, poinsettias, etc.

Scissors to cut off any extra fabric

Instructions:

1. Spread Modge Pod or Glue on the fabric strip and wrap around the foam ball, bunching your fabric ends at the top.
2. Continue attaching your fabric strips until the entire foam ball is covered.
3. To make the hanger, make a circle of jute about 6 inches tall.
4. Next, take another piece of jute twine about 14-18 inches long. This will be your bow, so the longer the twine, the larger the bow. You can always cut off the extra string.
5. Run this longer piece through the smaller circle and then tie it around the fabric bunches at the top of your ornament.
6. You can adjust the smaller circle so the knot is in the back of the ornament and hidden. Then tie it tightly and finish off with a bow.
7. Add Christmas Embellishments with the glue to your liking and enjoy your creation!
